EDUCATION

Rashtriya Raksha University

M.Tech in Data Science and Machine Learning

- CGPA: 7.41

Gandhinagar, Gujarat

2025 – 2027

R K University

B.Tech in Computer Engineering

- CGPA: 7.55

Rajkot, Gujarat

2022 – 2025

WORK EXPERIENCE

AndSwitch Tech

React.JS Intern

Rajkot, Gujarat

Nov 2024 – March 2025

- Built responsive and dynamic user interfaces using React.js, leveraging hooks, component lifecycle, and state management.
- Developed reusable UI components and maintained a consistent design system across multiple web applications.
- Integrated RESTful APIs with the frontend using Axios/Fetch, handling async data flow and error states effectively.

PROJECTS

RAG based Chatbot | *Python, Groq API, ChromaDB, phoenix, Streamlit, Docker* | [Github](#) | [Demo](#)

- Built a hybrid RAG chatbot combining ChromaDB semantic search and BM25 keyword search with cross-encoder reranking to retrieve context from user-uploaded documents.
- Generated citation-backed answers via Groq API with automated hallucination checking, Phoenix tracing, and Ragas evaluation; containerized with Docker and deployed on Streamlit Cloud.

AI Research Assistant | *Python, Streamlit, ChromaDB, BM25, LLM, Langfuse, Docker* | [Github](#) | [Demo](#)

- Built RAG pipeline that ingests PDF, DOCX, and TXT documents, splits text into overlapping chunks, generates embeddings stored in persistent ChromaDB vector database, and performs hybrid retrieval combining semantic search and BM25 keyword search for improved accuracy.
- Integrated Gemini LLM via Groq API to generate context-aware answers with source citations and multi-turn conversation memory, along with an agentic workflow for step-by-step reasoning.
- Implemented evaluation dashboard tracking Relevance, user authentication, Langfuse observability tracing, chat export to PDF, and full Dockerized deployment with Streamlit.

Deep-Fake Detection | *Python, PyTorch, Streamlit, OpenCV, NumPy, ResNet50, EfficientNet-B0* | [Github](#)

- Built an end-to-end deepfake detection pipeline that processes input images, performs classification to identify real vs. AI-generated content, analyzes patterns to detect source generators, and provides explainable results through visual highlighting of manipulated regions.
- Trained and compared ResNet50 and EfficientNet-B0 models to find the best balance between speed and accuracy for real-world fake image detection.

Medical Diagnosis System | *Python, Streamlit, Scikit-learn, Pandas, NumPy, PyPDF2* | [Github](#) | [Demo](#)

- Developed a medical diagnosis system that captures user symptoms, predicts probable diseases with confidence scores, supports report uploads for additional context, and generates visual insights along with downloadable reports and personalized precaution recommendations.

AI-Powered PM Internship Recommendation System | *Python, Flask, React.js, MongoDB, TF-IDF* | [Github](#)

- Designed an internship recommendation system that processes user profiles and resumes, extracts relevant skills, matches them with available opportunities, and delivers personalized internship suggestions through an interactive interface.

Club Management | *React.js, Node.js, Express.js, MongoDB, JWT, Tailwind CSS* | [Github](#)

- Developed a club management platform that handles user authentication, manages roles and permissions, streamlines club memberships and event registrations, and enables content sharing through announcements within an interactive dashboard.

SKILLS

Programming Languages: Python, Java, JavaScript, React.js, Node.js

Databases: PostgreSQL, MySQL, MongoDB

ML / DL Frameworks: TensorFlow, PyTorch, Scikit-learn

NLP / LLMs: RAG, LangChain, Langgraph, Langfuse, Transformer, Whisper, Hugging Face

Computer Vision: YOLOv8, OpenCV

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Power BI

Deployment & Tools: Streamlit, Docker, GitHub

CERTIFICATIONS

Artificial Intelligence Fundamentals — IBM SkillsBuild

RAG Course for Beginners — Simplilearn

Introduction to Generative AI Studio — Google Cloud

Introduction to Large Language Models — Google Cloud

INTERESTS

- Artificial Intelligence & Machine Learning, Computer Vision, Data Science, Data Analytics.
